Full Report on Manufacturers' Shipments, Inventories and Orders August 2011

Summary. New orders for manufactured goods in August, down two of the last three months, decreased \$0.8 billion or 0.2 percent to \$451.0 billion, the U.S. Census Bureau reported today. This followed a 2.1 percent July increase. Excluding transportation, new orders decreased 0.2 percent. Shipments, down following two consecutive monthly increases, decreased \$0.9 billion or 0.2 percent to \$450.2 billion. This followed a 1.2 percent July increase. Unfilled orders, up sixteen of the last seventeen months, increased \$7.6 billion or 0.9 percent to \$878.8 billion. This followed a 0.9 percent July increase. The unfilled orders-to-shipments ratio was 6.08, up from 6.06 in July. Inventories, up twenty two of the last twenty three months, increased \$2.4 billion or 0.4 percent to \$601.2 billion. This was at the highest level since the series was first published on a NAICS basis in 1992 and followed a 0.6 percent July increase. The inventories-to-shipments ratio was 1.34, up from 1.33 in July.

New Orders. New orders for manufactured durable goods in August, down two of the last three months, decreased \$0.2 billion or 0.1 percent to \$201.9 billion, unchanged from the previously published decrease. This followed a 4.2 percent July increase. Fabricated metal products, down two consecutive months, had the largest decrease, \$0.1 billion or 0.5 percent to \$25.5 billion. New orders for manufactured nondurable goods decreased \$0.6 billion or 0.3 percent to \$249.2 billion.

Shipments. Shipments of manufactured durable goods in August, down following three consecutive monthly increases, decreased \$0.3 billion or 0.1 percent to \$201.1 billion, revised from the previously published 0.2 percent decrease. This followed a 2.1 percent July increase. Transportation equipment, down following two consecutive monthly increases, decreased \$2.2 billion or 4.6 percent to \$47.1 billion. Shipments of manufactured nondurable goods, down following two consecutive monthly increases, decreased \$0.6 billion or 0.3 percent to \$249.2 billion. This followed a 0.4 percent July increase. Petroleum and coal products, down four of the last five months, drove the decrease, down \$1.8 billion or 2.5 percent to \$69.1 billion.

Unfilled Orders. Unfilled orders for manufactured durable goods in August, up sixteen of the last seventeen months, increased \$7.6 billion or 0.9 percent to \$878.8 billion, unchanged from the previously published increase. This followed a 0.9 percent July increase. Transportation equipment, up eight consecutive months, had the largest increase, \$6.1 billion or 1.2 percent to \$507.6 billion.

Inventories. Inventories of manufactured durable goods in August, up twenty consecutive months, increased \$3.3 billion or 0.9 percent to \$365.4 billion, unchanged from the previously published increase. This was at the highest level since the series was first published on a NAICS basis and followed a 1.1 percent July increase. Transportation equipment, also up twenty consecutive months, had the largest increase, \$1.4 billion or 1.3 percent to \$112.3 billion. Inventories of manufactured nondurable goods, down four consecutive months, decreased \$0.8 billion or 0.4 percent to \$235.8 billion. This followed a 0.1 percent July decrease. Petroleum and coal products, also down four consecutive months, drove the decrease, down \$1.6 billion or 3.1 percent to \$49.8 billion. By stage of fabrication, August materials and supplies increased 0.8 percent in durable goods and 0.7 percent in nondurable goods. Work in process increased 0.7 percent in durable goods and decreased 2.8 percent in nondurable goods. Finished goods increased 1.2 percent in durable goods and decreased 0.1 percent in nondurable goods.

Figures in text are adjusted for seasonality but not for inflation. Figures on new and unfilled orders exclude data for semiconductor manufacturing. For data, call (301) 763-4673 or go to <<http://www.census.gov/m3>>.

The advance report on durable goods for September is scheduled for release on October 26, 2011, at 8:30 a.m. EDT and the full report on November 3, 2011, at 10:00 a.m. EDT. See back page for survey description.

Table 1. Value of Manufacturers' Shipments for Industry Groups¹

[Estimates are shown in millions of dollars and are based on data from the Manufacturers' Shipments, Inventories, and Orders Survey.]

^P Preliminary^r Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes. See note at end of Table 2 relating to survey error and revision.

² Estimates and percent changes of shipments for the semiconductor industry are no longer shown separately, but are included in computers and electronic products, and all other applicable aggregate totals.

Table 2. Value of Manufacturers' New Orders for Industry Groups¹

[Estimates are shown in millions of dollars and are based on data from the Manufacturers' Shipments, Inventories, and Orders Survey.]

^p Preliminary ^r Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Data on new orders are not available for the semiconductor industry. Estimates and percent changes for new orders exclude semiconductor industry data.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <<http://www.census.gov/manufacturing/m3/>>.

^P Preliminary^F Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Estimates of inventories for the semiconductor industry data are included in computers and electronic products and all other applicable aggregates totals, but are not shown separately.

See note at end of Table 2 relating to survey error and revision.

Table 5. Value of Manufacturers' Shipments, New Orders, Unfilled Orders, and Total Inventories for Topical Series^{1,2}

X Not Applicable ^p Preliminary ^r Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Topical series are regroupings of the separate industry categories.

³ Nondefense capital goods industries include: small arms and ordnance; farm machinery and equipment; construction machinery; mining, oil, and gas field machinery; industrial machinery; vending, laundry, and other machinery; photographic equipment; metalworking machinery; turbines and generators; other power transmission equipment; pumps and compressors; material handling equipment; all other machinery; electronic computers; computer storage devices; other computer peripheral equipment; communications equipment; search and navigation equipment; electromedical, measuring, and control instruments; electrical equipment; other electrical equipment, appliances, and components; heavy duty trucks; aircraft; railroad rolling stock; ships and boats; office and institutional furniture; and medical equipment and supplies.

⁴ Defense capital goods industries include: small arms and ordnance; communications equipment; aircraft; missiles, space vehicles, and parts; ships and boats; and search and navigation equipment.

⁵ Estimates and percent changes exclude semiconductor industry data.

⁶ Based on year-to-date for shipments and new orders, but on same month prior year for unfilled orders and inventories.

See note at end of Table 2 relating to survey error and revision.

Table 6. Value of Manufacturers' Inventories, by Stage of Fabrication, by Industry Group¹

^P Preliminary^r Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

See note at end of Table 2 relating to survey error and revisions.

¹ The current month revisions are the difference between the advance percent change and the percent change as shown in this publication.

² The twelve month revisions are the differences between the month- to- month percent changes of the preliminary and final estimates. The monthly averages are the simple averages of the absolute values of the differences for the months specified. The advance to final percent change revisions for the durable goods industries are shown in the advance report for the month.

³ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non- calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading- day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

Survey Description

This report is compiled from results of the U.S. Census Bureau's Manufacturers' Shipments, Inventories, and Orders (M3) survey. This survey provides statistics on manufacturers' value of shipments, new orders (net of cancellations), end-of-month order backlog (unfilled orders), end-of-month total inventory (at current cost or market value), and inventories by stage of fabrication (materials and supplies, work-in-process, and finished goods). The M3 includes approximately 4,300 reporting units. Units may be divisions of diversified large companies, large homogenous companies, or single-unit manufacturers in 89 industry categories. Due to the small monthly sample, these 89 categories have been combined into 65 publication levels. The survey methodology assumes that the month-to-month changes of the total operations of those companies in the monthly survey effectively represent the month-to-month movements of all establishments that make up the category. The current coverage levels in the survey show that reported data in the monthly survey represent approximately 60 percent of the shipments estimates at the total manufacturing level. Data published represent manufacturing in a calendar month. The data collection is based on a voluntary survey authorized by Title 13 of the United States Code.

The data presented in this release are based on data obtained from a panel of 4,300 reporting units and provide an indication of the activity within the manufacturing sector. The results differ from what would be obtained from a complete enumeration of all manufacturing companies. In addition, a different panel of 4,300 companies would yield different results. The M3 panel is comprised of companies with \$500 million or more in shipments and a limited number of smaller companies. From a statistical perspective, the panel is not a probability sample; therefore, the sampling errors that are normally provided with sample surveys cannot be measured. Nonsampling errors are attributable to many sources. The use of company or divisional reports to estimate the monthly change for establishments is one source of nonsampling error. The use of primarily large companies to represent the month-to-month movement of all companies is another potential source. Any corrections will be published in the full report. Corrections received after the full report will be released in the next month's advance report. Any revisions made later than two months will be reflected in the annual benchmark publication.

Additional survey documentation can be found on our web site: <http://www.census.gov/m3>.
